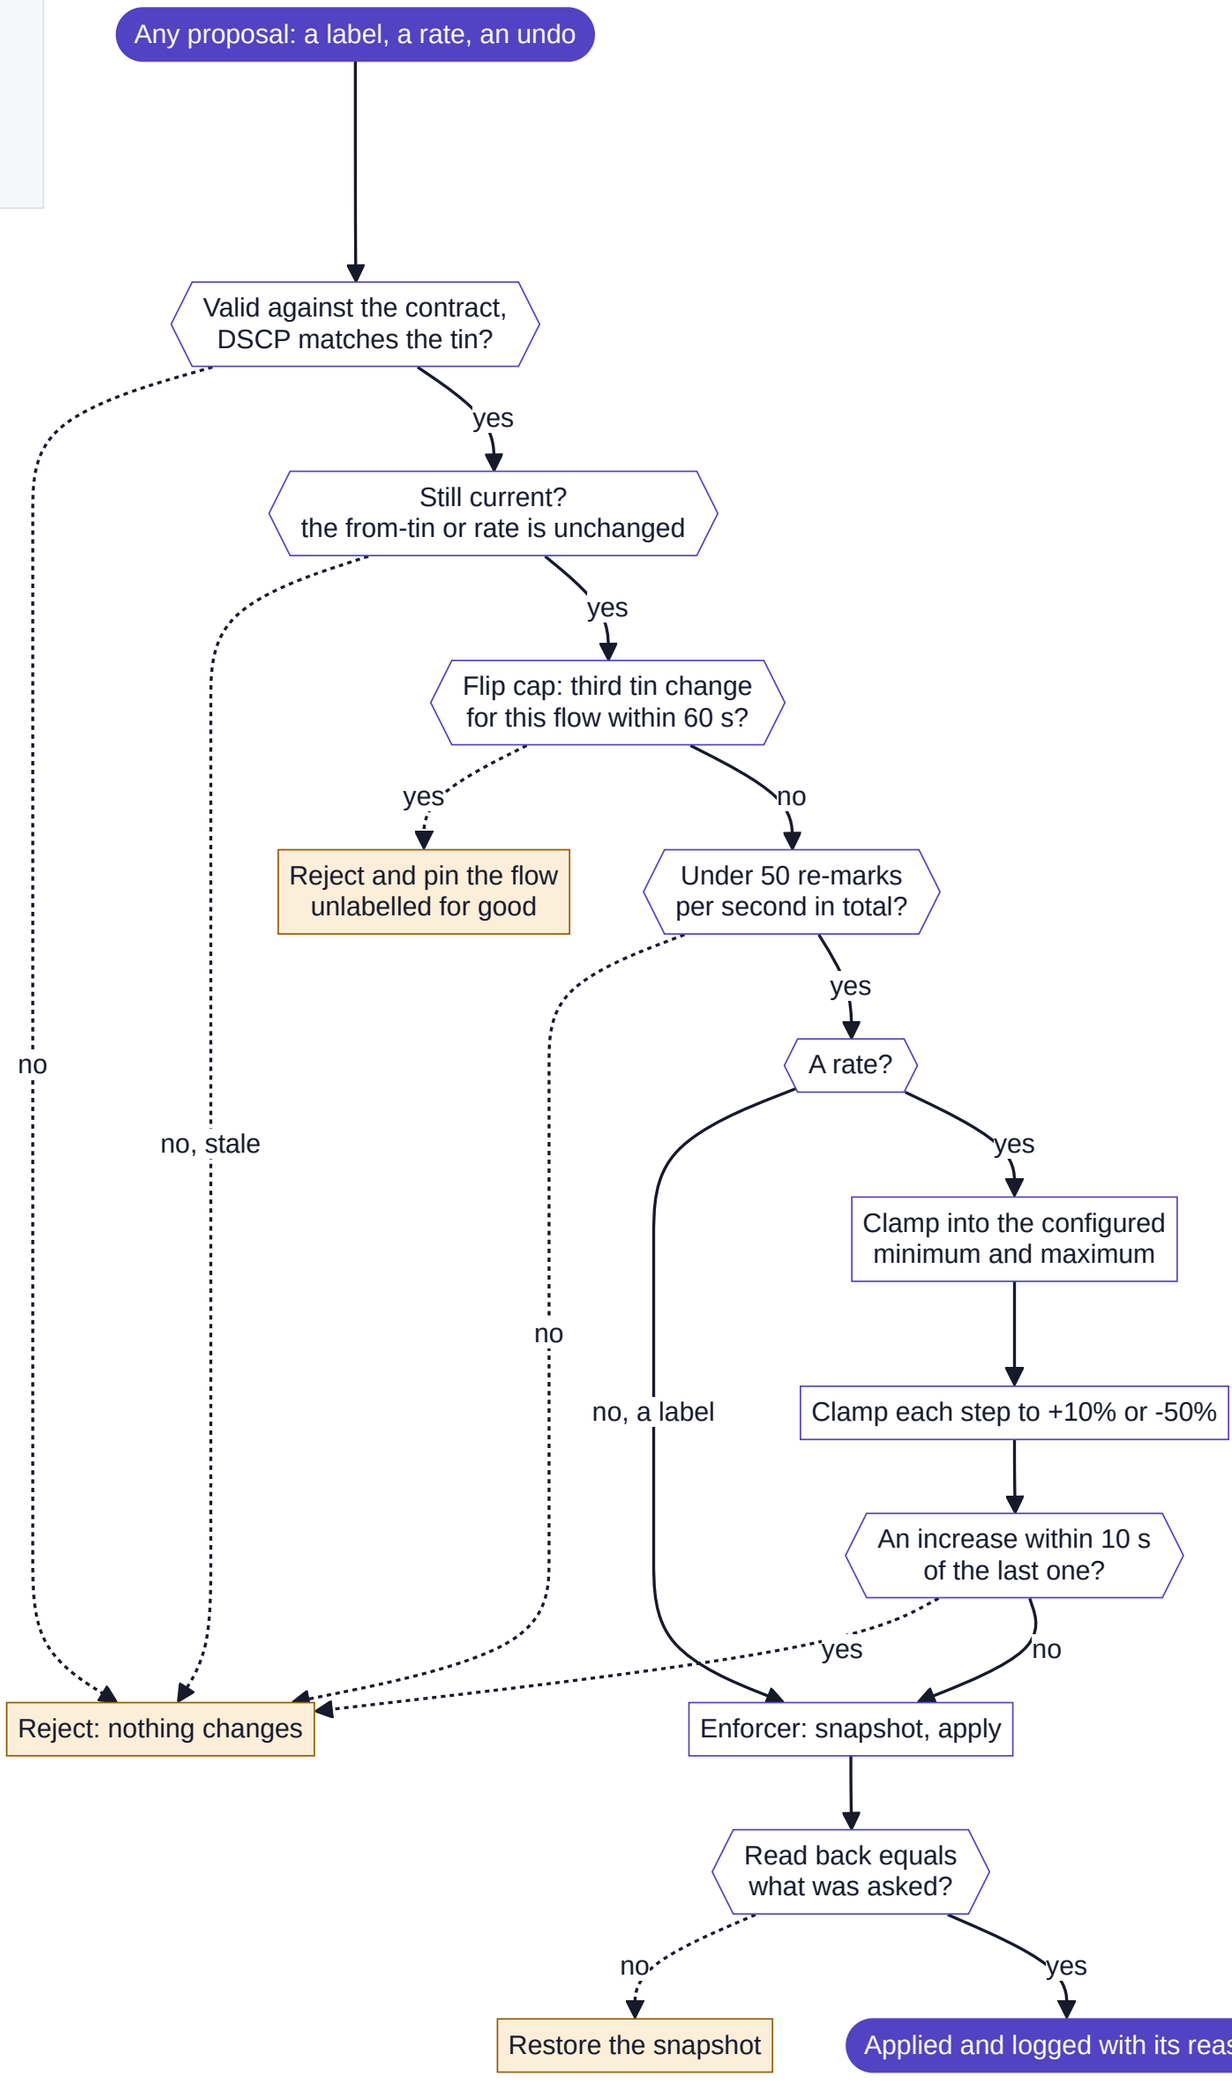
Running beside it all the time
Watchdog: heartbeat older than 2 s?
no
yes
Controller touches a heartbeat every 250 ms
Remove marking: plain CAKE at safe rates
Classifier slow or down (50 ms deadline, queue 1,024)
Flow stays unlabelled: plain CAKE



Any proposal: a label, a rate, an undo
Valid against the contract, DSCP matches the tin?
yes
Still current? the from-tin or rate is unchanged
yes
Flip cap: third tin change for this flow within 60 s?
yes
Reject and pin the flow unlabelled for good
no
Under 50 re-marks per second in total?
yes
A rate?
yes
Clamp into the configured minimum and maximum
Clamp each step to +10% or -50%
An increase within 10 s of the last one?
yes
no
Enforcer: snapshot, apply
Read back equals what was asked?
no
Restore the snapshot
yes
Applied and logged with its reason
no
no, stale
no
no, a label
Reject: nothing changes
